Tele-Ophthalmology

CONNECT

Connect any imaging device, regardless of the manufacturer. Our platform supports OCT's, SLO's, fundus cameras, visual field devices and many more.

STORAGE

A medical grade archiving system. The storage system allows quick access to all patient information at your store or at a remote site. All data is encrypted and backed up.

VIEWER

A fully web-based software - make any computer an inclusive review station. Our unique image enhancement and manipulation tools enable you to make accurate diagnostic decisions.

TELE-OPHTHALMOLOGY

Need a second opinion? Our Tele-Ophthalmology portal is securely accessible by accredited specialists from any computer at any location.

INTEGRATION

The platform supports seamless integration not only to devices but also to EMR's and other information systems like PACS and National Health Records.

REPORTING AND ANALYTICS

We provide reporting and analytics that can be customised to your specific needs. Our fully customisable reporting tool enables you to run reports that support your clinical analytics and business intelligence.

ARTIFICIAL INTELLIGENCE

Our AI integration is your second opinion, consider it decision support; it's there when you need it. AI software helps early detection and accurate diagnosis in a fast and secure manner.

Turn-key Solution. Peace of Mind.
